Beschreibung

STILL RX 20-16 – 1.6-ton Electric Forklift – Triplex Mast For sale: STILL RX 20-16 electric forklift with a lifting capacity of 1,600 kg and a three-stage triplex mast. Fully inspected by a specialist. The battery has been tested using a Fronius charger (see photo). Invoice available. The forklift is ready for immediate use, with a good battery and good tyres! Charger included. The STILL RX 20-16 is known as a compact, powerful and highly manoeuvrable electric forklift. Thanks to its compact design, this machine is ideally suited for use in warehouses, industrial buildings and other locations where manoeuvring space is limited. Three-stage Triplex Mast This model is equipped with a three-stage triplex lifting mast. The main advantage is that a high lifting height can be combined with a relatively low overall height when lowered. This makes the forklift suitable for stacking at higher racking levels while still being able to pass through relatively low doorways and entrances. Depending on the triplex mast fitted, the RX 20-16 is available with various lifting heights. The exact lifting height and overall lowered height of this machine can be provided upon request. Compact and Manoeuvrable With a width starting from approximately 1.10 metres, the RX 20-16 is particularly compact. This allows the forklift to manoeuvre easily in narrow aisles and confined warehouse environments. Electric Drive The RX 20-16 is fully electrically powered. This means quiet and emission-free operation, making the forklift particularly suitable for indoor use. The truck operates on a 48V electrical system and combines powerful driving and lifting performance with precise and comfortable controls. Specifications Brand: STILL Model: RX 20-16 Power: Electric Lifting capacity: 1,600 kg Load centre: 500 mm Mast: Three-stage / Triplex mast Electrical system: 48V Compact design Highly manoeuvrable Suitable for indoor use Emission-free drive Versatile electric forklift The STILL RX 20-16 is an excellent choice for warehouses, logistics companies, manufacturing companies and distribution centres. Thanks to the combination of a 1,600 kg lifting capacity, compact dimensions and a three-stage mast, this forklift is suitable for both internal transport and placing or retrieving pallets at height. A professional, compact electric forklift that offers an excellent combination of manoeuvrability, lifting capacity and high lifting height. Interested?
