

Visa 130 kVA SDEC stamford aggregaat generatorset

General characteristics

Brand	Visa
Subcategory	Generator
Hours displayed	5000
Colour	Yellow
Condition	Used
General state	Good
Fuel	Diesel

Description

For Sale: VISA SD130GX Professional Diesel Generator – 130 kVA / 104 kW – 400/230 V – 1500 rpm For sale: a professional VISA SD130GX diesel generator set / power generator with a PRP output of 130 kVA / 104 kW. This is a heavy-duty professional generator set manufactured by the Italian company VISA S.p.A. The generator is designed for applications where a reliable and powerful electricity supply is essential. With an output of 130 kVA, this generator is ideally suited for industrial applications, construction sites, agricultural businesses, workshops, events, temporary power supply and emergency/standby power applications. The generator supplies 400/230 V, is configured as 3-phase + neutral, and operates at 1500 rpm. This makes it a professional generator suitable for demanding applications and extended periods of operation. Technical Specifications Brand: VISA Model: SD130GX Type: GA44X Manufacturer: VISA S.p.A. Country of manufacture: Italy PRP output: 130 kVA PRP output: 104 kW Voltage: 400 / 230 V Rated current: approx. 187 A Frequency: 50 Hz Power factor (cos ϕ): 0.8 Engine speed: 1500 rpm Configuration: 3-phase + neutral Governor class: G1 Standard: ISO 8528 CE marking: Yes Professional industrial configuration Power Output – 130 kVA / 104 kW The generator has a PRP (Prime Power) rating of 130 kVA / 104 kW. PRP refers to the power rating for which a generator set is designed during normal professional operation with varying electrical loads. This makes the VISA SD130GX suitable for situations where an independent power supply is required for extended periods. Thanks to its 400/230 V configuration, the generator can be used for both three-phase industrial equipment and various 230 V applications, depending on the installed connections and electrical load. The rated current is approximately 187 amps at 400 V. Professional 1500 rpm Generator The generator operates at 1500 rpm at 50 Hz. This type of low-speed generator set is commonly used for professional and industrial power applications. This makes the machine particularly suitable for customers who are not looking for a small portable generator, but require a heavy-duty professional generator for serious power supply applications. Suitable as an Emergency / Standby Generator The VISA SD130GX is also well suited for use as an emergency or backup generator. In the event of a mains power failure, a generator of this capacity can be used to supply essential machinery, installations, business processes and other electrical equipment. Depending on the installed control system and electrical installation, the generator may also be integrated into a professional emergency or standby power system. Wide Range of Applications With its 130 kVA capacity, this generator is suitable for a wide variety of applications, including: Construction sites and temporary site power Industrial facilities Production environments Workshops Agricultural businesses Machinery and installations Pumps an
